

APPENDIX A-142

TYPE OF CHANGE CODES

1. Number of characters: One.
2. Type of code: Alpha.
3. Explanation: A one-character, alphabetic code which identifies a new submission or a change applicable to an original submission.
4. Source: DoD 4140.26-M, Volume I, Chapter 4.
5. The following codes are assigned:

<u>CODE</u>	<u>EXPLANATION</u>
C	Changes in quantities to increase retail or wholesale quantity. The revised quantity required should be entered, as applicable, in the Retail and Wholesale Quantity Field Legends.
D	Deleted part, but not superseded by another part. This deletion involves all of the original requirements. The Retail and Wholesale Quantity Field Legends shall be filled with zeros.
H	Reduction of previously submitted Supply Support Request (SSR) requirements. The revised quantities are entered in the Retail and Wholesale Quantity Fields as applicable.
N	Original submission of complete provisioning data, or other program data and SSRs for a Provisioning Control Code (PCC), or an increment within a PCC under which more than one increment may be submitted, reflecting a different Date of Request (DOR).
P	Design or program change to an original submission under the same PCC (PDSSR only).
R	Superseded part. The revised quantity to support the original requirement is reduced and shall be entered in the Retail and Wholesale Quantity Field Legends, as applicable. If the original requirement is completely deleted, the Retail and Wholesale Quantity Field Legends shall be filled with zeros. Must be accompanied by a Type of Change Code (TCC) S transaction.

<u>CODE</u>	<u>EXPLANATION</u>
T S	Superseding part. Provides total required quantities of superseding item.
	Technical or clerical errors other than the Retail and Wholesale Quantity Field Legends. Applicable only to technical or clerical errors detected on previous submissions for which acceptance response has been received from an IMM. For Retail and Wholesale Quantity Field Legends, TCC C or D shall be used to either increase or decrease quantity field legends. TCC T shall not be used for resubmission of a reject.
V	A nonprovisioning SSR that provides requirements for items not originally provisioned that are generated from requisition processing, or requests for support from field activities.
